Fetch covers alternative therapies (think: acupuncture) when administered by a vet.

We cover conditions linked to breed (like: hip dysplasia in German Shepherds).

Fetch covers up to \$1,000 in behavioral therapy and medicine.

Pets of Every Age

We cover pets from 6 weeks old through their golden years.

A nose-to-tail exam to make sure your pet is healthy and find any hidden signs of illness.

Vaccinations

Protection against infectious diseases like rabies that can cause serious illness or death.

Heartworm, flea & tick prevention

Preventive medication to keep your pet safe from harmful parasites and disease-carrying insects.

Dental cleaning

More than just a good brushing. A comprehensive oral exam to detect and treat dental disease.

Spaying or neutering

Procedures with health benefits like preventing certain cancers and behavioral issues.

Blood, urine & fecal tests

Tests to show how well your pet's body is functioning, catch illnesses early and detect harmful parasites.
